

UNIVERSITY OF GOTHENBURG

Available position

18th of March 2010 Ref nr: E 352 1148/10

The Faculty of Science at University of Gothenburg invites applications for a vacant permanent position as

Position as research engineer in molecularbiology

The Department of Cell and Molecular Biology (CMB) announces a position as research engineer in molecular biology, with a specialisation in cell cycle studies in *Schizosaccharomyces pombe*.

The position encompasses analysis of the mechanisms by which chemical inhibitors regulate cell division and cell cycle progression in eukaryotes. The tasks include research and methods development.

The successful applicant shall have a Ph.D. degree in molecular or cellular biology, as well as several years of post-doctoral experience from experimental scientific research. It is further necessary to be able to document experience of analysis of cell cycle progression in *Schizosaccharomyces pombe* cells using FACS (fluorescence-activated cell sorter) and fluorescence microscopy, as well as protein biochemistry. It is an advantage to have documented experience of analysing the impact on cells of chemical inhibitors.

For further information, contact:

Head of Department Prof. Per Sunnerhagen, phone +46-31-786 3830

E-mail: Per.Sunnerhagen@cmb.gu.se

Applications should be addressed to:

The Registrar, University of Gothenburg, Box 100, SE-405 30 Göteborg, Sweden

Reference number:

The application should be sent **no later than 8th of April 2010**

Mark the application with the reference number: **E 352 1148/10**

Trade union representatives:

SACO Martin Björkman +46-31-786 3608

SEKO Lennart Olsson +46-31-786 11 73

OFR-S Astrid Igerud, +46-31-786 11 67
